

The **National Incubation Center Lahore** (NICL) at **LUMS**, in collaboration with the **University of Saarland**, successfully conducted the 2nd batch of Entrepreneurship 101 in July 2022. This **4-week**, asynchronous training course was designed to give individuals with no prior experience, a look inside the world of entrepreneurship. The participants were asked to form groups and come up with an idea for a startup that they would work on for the duration of the course. The online training was supported by in-person sessions with LUMS faculty to give the participants a more immersive experience with greater insights into developing the ideas they had formed.
